PROFESSIONAL EXPERIENCE

Associate Developer(Full-Stack), **DG Infotech Ltd.**

📅 Nov 2024 – May 2025 | Gulshan-1, Dhaka

eKYC and Admin Portal

Nov 2024 – May 2025

- Built a secure identity verification system using NID, Passport, and OCR.
- Developed RESTful APIs with JWT auth and encrypted data handling (Java).
- Created frontend (React, Tailwind) for user onboarding and admin dashboard.
- Integrated OCR for automated document parsing and validation.
- Implemented admin reporting, monitoring, and user management features.
- Deployed using Docker and NGINX for scalable production setups.
- **Tech:** Java, PostgreSQL, OCR, JWT, Docker, React, TypeScript.

Software Engineer L-I(Backend-Golang), **Vivasoft Limited**

📅 Mar 2024 – Oct 2024 | Banani, Dhaka

Pi-Inventory and Asset Management

May 2023 – Nov 2024

- Developed a comprehensive inventory and asset management system for Financify's accounting division:
- Tracked and managed inventory levels and company assets throughout their lifecycle.
- Included features for acquisition logging, maintenance scheduling, and depreciation tracking.
- Contributed to relational database design and backend API development.
- **Tech:** Go, Gin, PostgreSQL, GORM, Docker, Redis, Next.js, Tailwind CSS, TypeScript, RTK Query.

Associate Software Engineer (Intern), **Vivasoft Limited**

📅 Feb 2023 – Aug 2023 | Banani, Dhaka

- Contributed to **Golang Bootcamp** written in Bangla, an open-source initiative by Vivasoft Ltd.
- Actively working on a backend project (Golang).

Restaurant Management System (Backend) 🍷 April 2023 – May 2023

- Developed a restaurant management system to track orders and resources.
- Designed and implemented a secure REST API with the Echo framework in Go.
- Implemented JWT for authentication.
- Added role-based access control.
- Containerized with Docker for deployment.
- **Tech:** Go, Echo, MySQL, Docker, Redis.

PROJECTS

Mattermost Plugin – Employee Status Tracker 🍷

- Built a Mattermost plugin to track WFH, leave, and absence using keyword detection in messages.
- Logged user, timestamp, and channel info into PostgreSQL for reporting.
- Developed a React admin UI to view tracked data in tables.
- **Tech:** Go, React, Mattermost API, PostgreSQL, Docker

Result Processing System 🍷

- Developed a web app mimicking SUST's result system: students register for exams, access admit cards and results; teachers input grades and generate reports for assigned courses.
- Implemented role-based access control for students and teachers.
- Automated report generation and PDF export features.
- **Tech:** NodeJS, ExpressJS, MySQL, HTML, CSS, ReactJS, JavaScript

EDUCATION

BSc. (Eng.) in Software Engineering **Shahjalal University of Science and Technology**

📅 Jan 2019 – Feb 2024 CGPA : 3.26

SKILLS

- Language: Go Python Java JavaScript C/C++
- Backend Frameworks: Gin Echo Django Spring Boot
- Frontend Frameworks: ReactJS VueJS
- Database: MySQL PostgreSQL MongoDB GORM JPA
- DevOps: Docker Git Github Gitea Bitbucket Jira
- Others: Redis RabbitMQ Kafka

RESEARCH

An Empirical Approach Toward Identifying the Core Sentiments of Bengali Music Using Machine Learning and Neural Network Classifiers

August 2023 – Present

- Conducting research focused on sentiment analysis of Bengali music lyrics to classify emotional tones such as joy, sadness, anger, and love.
- Created a curated dataset of Bengali song lyrics annotated with sentiment labels based on linguistic and contextual cues.
- Applied traditional machine learning algorithms (e.g., SVM, Random Forest) and deep learning models (e.g., LSTM, BiLSTM) to evaluate classification performance.
- Performed extensive preprocessing of Bengali text including normalization, tokenization, and stopword removal to improve model accuracy.
- Aiming to contribute to Bengali NLP by providing sentiment-labeled datasets and comparative insights into model efficacy.

PARTICIPATION

- Participated in **CodeSamurai Hackathon** at Dhaka University, Dhaka. 2024
- Participated in **Hackathon** at Leading University, Sylhet. 2023
- Participated in **Hackathon** at Dhaka University, Dhaka. 2023

LANGUAGES

- Bengali (Native or Bilingual Proficiency)
- English (Intermediate)
- Japanese (N5)
